

# THE GREEN FINANCE **TRANSFORMATION**

## **GREEN FINANCE IN NUMBERS**

Green Finance is any structured financial activity created to encourage the development of green projects or minimize the impact on the climate of more regular projects to ensure a better environmental outcome.1

The global sustainable finance market size is projected to reach **\$22.5 Trillion** by 2031<sup>2</sup>.

The value of green bonds traded could soon hit \$2.36 Trillion by 20231.

The number of publicly traded companies involved in green activities reached 669 in 20213.

#### BENEFITS OF GREEN FINANCE FOR BUSINESS

Company can reap the financial rewards from green financing to achieve a cost-effective, smart and responsible business goal.

 Increased demand for eco-friendly business from consumers

Tax benefits and financial incentives from the government

O Increase the company's reputation as a sustainability business
